

YJ-831A 橡膠大底打粗機

RUBBER OUTSOLE ROUGHING MACHINE

特性 Features :

1. 本機適用於橡膠鞋底打粗、凹凸不平或模型壓出之鞋底磨粗用。
This machine is suitable for roughing of rubber soles, uneven or the soles of the model pressed out for rough use.
2. 本機採用雙頭固定型金鋼砂輪軸打粗，使生產更方便，穩定性高、不易變型。
The machine adopts double-head fixed type steel grinding wheel shaft to make the machine thicker, which makes the production more convenient, high stability and difficult to change.
3. 自動變頻送料，操作簡便安全。
Automatic frequency feeding, easy and safe operation.
4. 加裝特殊毛刷輪掃灰功能，使鞋底打粗起毛後更乾淨整潔。
Install special brush wheel function for sweeping dust, make the sole cleaner and tidier after roughing and fluffing.
5. 附帶主吸塵器吸灰塵，另加配置有中央吸塵連接口，移動安裝更方便。
Attached to the main vacuum cleaner to absorb dust, plus the configuration of having a central vacuum cleaner connection port, mobile installation is more convenient.

規格 Specification :

電壓 Voltage : 380V

功率 Power : 5KW 50/60HZ

尺寸 Size : 1210*1000*1500MM
