

性能特點 features of performance :

1. 本機主要用途是加熱鞋面，鞋子或者帶有需要軟化材料的一些部件。
The main purpose of this machine is to heat the upper, shoes or some materials that need to be softened.
2. 採用電流控制器控溫遠紅外線燈管 120w，大扇葉風機共同控制烤箱溫度，是烤箱溫度均勻，正確可調。
The current controller is used to control the temperature of infrared lamp and 120W large fan blade fan to control the oven temperature together, the oven temperature is even, correctly adjustable.
3. 輸送帶採用可調速電機，與電流控溫結合，可配合不同鞋面部件，不同材質在溫度方面的要求。
Conveyor belt adopts adjustable speed motor, which is combined with current temperature control, can be used to match different upper parts and different materials in the temperature requirements.
4. 烤箱主體四周全部加裝隔熱棉，減少熱能流失，降低能耗，同時也避免機器外部過熱。
Around the main body of the oven installed heat insulation foam, reducing heat loss, reducing energy consumption, but also to avoid external overheating of the machine.

機器技術參數 Technical parameters of machine :

外形尺寸：L1200*W600*H780mm
有效溫區：L800*W400*H200mm
加熱方式：遠紅外線+SCR
電源電壓：三相 380V
整機功率：3.5KW
輸送帶速度：可調範圍 10s-100s

Outline dimension : L1200*W600*H780mm
Effective temperature zone : L800*W400*H200mm
Heating mode : Far-infrared + SCR
Power supply Voltage : Three-phase 380V
Machine Power : 3.5KW
Conveyor belt speed : Adjustable range 10s-100s
