

YJ-8268A 雙頭燙壓機

DOUBLE-HEAD IRONING PRESS MACHINE

圖為：燙壓好的標籤

規格/Specification:

- | | |
|---------------------------|---------------------|
| 1. 電壓Voltage: | AC220V 50/60HZ |
| 2. 功率Power: | 0.42kw |
| 3. 外形尺寸Dimensions(L*W*H): | 680*860*1200MM |
| 4. 氣壓: | 4kg/cm ² |
| 5. 淨重Net Weight: | 125kg |

用途Use:

該機適用於鞋業、箱包、手袋、手套等各種熱熔壓印標籤, 熱壓多工序一體化作業, 通過該器作業能提高產量效率, 同時也能提高品牌的檔次。

The machine is suitable for various hot-melt embossing labels such as shoes, bags, handbags, gloves, etc., and the hot pressing multi-process integration operation can increase the productivity through this operation and enhance the brand's grade.

特性Features:

熱熔壓印方式 Hot melt embossing method.

1. 該機採用精密的氣動機構自動吸取放置標籤、快捷準確定位、節省時間、燙印效果標準美觀。根據現場應用的信息反饋, 增加了單機單人操作雙工位的結構設計、左右工位的交替循環工作相較比單工位燙標機提升了30%-50%的效率。

The machine adopts a precise pneumatic mechanism automatically suck and place labels, quick and accurate positioning, saving time, hot stamping effect is standard and beautiful, according to the information feedback of the field application, the structural design of the single-machine single-operator double-station is increased, and the alternating cycle work of the left and right stations is 30%-50% more efficient than the single-station hot stamping machine.

2. 每壓一標籤可根據材料的熱熔時間及溫度調節, 均為3-4秒能完成一個標籤(適用於快速生產線上)。

Each label pressing can be adjusted according to the hot melt time and temperature of the material, and can be complete a label in 3-4 seconds. (suitable for fast production lines)
