

# YJ-8120H 桌上型電腦精密切織帶機

## DESKTOP COMPUTER PRECISION CUTTING RIBBON MACHINE

### 技術性能及指標 Technical performance and indicators

切斷長度 Cutting length : 15-99999 mm

刀片最大斜度 Maximum blade slope :

電壓/頻率 Voltage/frequency : 110V/220V 50/60 hz

刀片最高溫度 The highest temperature of blade : 420°C

重量 Weight : 21.3 / 26 kg

全自動切斷，操作簡單，適用範圍廣，切斷品質高

Fully automatic cutting, simple operation, wide range of application, high cutting quality.

最大切斷寬度 Maximum cutting width : 100 mm

切斷速度 Cutting speed : 120 p/min

額定功率 Rated power : 0.5 kw

包裝尺寸 Package size : 410×525×430 mm

裝箱率 Packing rate : 1 台 one set

### 功能特性 Function features

1. 高速：每分鐘可切斷 100~120 片。(以 50mm 長度為例)

High speed: It can be cut 100~120 pieces per minute. (take the length of 50mm as an example)

2. 高精度：每一次切斷都由步進電動機監控，以保證每次操作的高精確性。

High precision: Each cut is monitored by a stepper motor, to ensure high accuracy for each operation.

3. 切斷面平整：熱刀可對彩色絲帶、輕薄紡織帶的切斷面進行高溫熱封，且封口平整無毛邊，刀刃由進口優質鋼製成，使用壽命長。

The cutting surface is flat : Hot knife can be color ribbon, the cut surface of light and thin textile belt, and the sealing is smooth without burrs, the blade is made from imported high-quality steel, having a long service life.

4. 自動操作：只需設定您所需的切斷長度和數量，其餘工作都自動完成。

Automatic operation: Simply set the cut length & quantity you need, the remaining work is done automatically.

5. 自動暫停：一旦材料用完，將自動停止工作。

Auto pause: As soon as measure runs out of materials, it will be automatically stop working.

6. 記憶功能：在開關關閉前，自動存儲所設值的切斷長度和切斷數量以及切斷速度。

Memory function: Before the switch is turned off, automatically stores the value of cutting length, cutting quantity and cutting speed was set.

### 可切斷材質 Material can be cut off

尼龍織帶、彩色緞帶、背包帶、等尼龍材質。

Nylon ribbon, colored ribbon, backpack strap and other nylon materials.
